Division Description

The Office of Species Conservation was created in 2000 with the addition of Section 67-818, Idaho Code. It established an agency within the Executive Office of the Governor for the purpose of: 1) providing coordination and cooperation among and between various state and federal agencies with responsibilities for species management under the Endangered Species Act; 2) developing an integrated state policy toward those species; 3) soliciting and reviewing scientific information; 4) negotiating and implementing conservation plans and agreements; 5) providing the resources and authority necessary to recommend an appropriate management plan for species that may be delisted under the ESA; and 6) facilitating the development and use of federal and state programs and incentives to provide protections for nonfederal landowners willing to assist in the management of federally listed endangered species, threatened species and petitioned species.

The General Fund appropriation provides for six positions: an administrator, attorney, one policy advisor, a grants and contracts program specialist, an administrative assistant, and a regional program coordinator. A small amount of dedicated spending authority is provided for donations or miscellaneous receipts. The budget also includes federal spending authority for administrative costs and pass-through monies to other entities for species conservation.

Performance Highlights:

- Negotiated settlement with the Bonneville Power Administration to receive \$6.5 million per year for ten years.
- Authorized to expend funds from the Snake River Basin Adjudication for \$5.0 million per year for five years.
- Authorized for 2 new FTEs for the project development and administration of the above BPA & SRBA funds
- Solicited, reviewed and funded projects with Pacific Coast Salmon Recovery funds.
- Solicited, reviewed and funded projects with sage grouse congressional funding.
- Developed candidate conservation plan for sage grouse.

Office of Species Conservation Agency Profile

Staff located at Capitol Park Plaza, 300 N. 6th, Boise, leased from Dept of Lands: 2127 sq. feet at \$30,653/yr (\$14.41/sq.ft.)

From the 2007 - 2010 Strategic Plan

Mission

To coordinate policies and programs related to the conservation of threatened, endangered and candidate species in Idaho.

<u>Vision</u>

The Governor's Office of Species Conservation is dedicated to planning, coordinating, and implementing the State's actions to preserve, protect and restore species listed as threatened and endangered under the federal Endangered Species Act (ESA). This work will be done through coordination with the state natural resource agencies and with the input of the citizens of Idaho, while taking into consideration the economic vitality of the state.

Principles and Values

- * Rely upon science and common sense in developing conservation programs.
- * Involve all parties impacted by recovery decisions.
- * Understand and incorporate Idaho values into conservation measures.
- * Incorporate the state's need for economic vitality into considerations for species recovery.

Issues

- 1) Work with state natural resource agencies to coordinate actions on ESA-listed species.
- 2) Facilitate the development of protection plans for private landowners who have threatened or endangered species on their property or who have the potential to assist in the recovery of the species.
- 3) Solicit, provide, and delegate funding to efforts to: a) preclude the need for listing of species through conservation efforts; b) preserve and restore listed species through conservation efforts; and c) delist recovered species through conservation efforts.
- 4) Develop processes to de-list or re-categorize species which should be removed from the ESA or have changed in management status.
- 5) In conjunction with the Northwest Power Conservation Council, coordinate the development of "Subbasin Plans" to protect, restore and recover threatened or endangered fish, wildlife and plants in Idaho.
- 6) Develop proactive initiatives on ESA reform, both at the state and federal level, in conjunction with Governor Otter's desire to provide Idahoans' superior constituent services.

The Fish and Wildlife Service, in the Department of the Interior, and the National Oceanic and Atmospheric Administration (NOAA) Fisheries, in the Department of Commerce, share responsibility for administration of the Endangered Species Act. Through the Listing Program, the Services determine whether to add a species to the federal lists of endangered and threatened wildlife and plants. Once listed, a species is afforded the full range of protections available under the Endangered Species Act, including prohibitions on killing, harming or otherwise "taking" a species. In some instances, species listing can be avoided by the development of Candidate Conservation Agreements which may remove threats facing the species. Designation as a "nonessential experimental population" under the 10(j) rule of the ESA assures that species are fully protected from intentional harm, but keeps their presence from restricting current and future land management practices.
